Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A blog creator / user	create and manage blog posts through an API	managing posts can require multiple disconnected operations	a simple, structured blog management backend is needed	it is difficult to manage my blog efficiently
PS-2	An application developer	connect my application to blog services	API responses and data handling need to be consistent and reliable	the backend should provide clear routes, validation and JSON responses	I need confidence that the API will work correctly
