

Ideation Phase

Empathize & Discover

Date	22 September 2026
Team ID	SWTID-2026-8694
Project Name	AI BLOGNEST API
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Map – AI BLOGNEST API

SAYS • "I want to create and manage blogs easily." • "I need clear API responses."		THINKS • "Is my data stored safely?" • "Will the API work reliably?"
	USER Blog creator / application developer	
DOES • Creates, reads, updates and deletes blog content • Tests API endpoints • Uses login/authentication		FEELS • Wants a simple development experience • Wants confidence in API reliability • Feels frustrated by complex manual processes

GOALS

- Manage blog content through REST API operations
- Store and retrieve data using MongoDB
- Receive consistent JSON responses

PAINS / CHALLENGES

- API validation and error handling can be difficult
- Database connection/configuration issues
- Need reliable testing of API endpoints
