

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	25 September 2026
Team ID	SWTID-2026-6223
Project Name	AI BlogNest API
Maximum Marks	4 Marks

Project Members: NISHANTHI.R, NADHIYA.V, POOJA.S, ANUSUYA.M

Functional Requirements:

Following are the functional requirements of the proposed AI BlogNest solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form
		Registration through Gmail
		Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email
		Confirmation via OTP
FR-3	User Authentication	User login with registered credentials
		Authentication and access control for protected API operations
FR-4	Blog Management	Create, read, update and delete blog posts through API
		Validate blog data and return appropriate JSON responses

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The API should be simple to use, with clear endpoints, request formats and response messages.
NFR-2	Security	User credentials and protected operations should be handled securely with authentication and validation.
NFR-3	Reliability	The system should handle valid requests consistently and provide meaningful error responses for invalid requests.
NFR-4	Performance	API requests should be processed efficiently with reasonable response time.
NFR-5	Availability	The API should be available for

		authorized clients whenever the service is running and the database is accessible.
NFR-6	Scalability	The solution should support growth in users, blog posts and API requests without requiring a complete redesign.

Prepared for Project Design Phase-II
