

Project Design Phase

Problem – Solution Fit Template

Date	22 September 2026
Team ID	SWTID-2026-8694
Project Name	AI BLOGNEST API
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ Understand the existing situation in order to improve it for your target group.

Template:

1. CUSTOMER SEGMENT(S) Blog creators, students and application developers who need a simple blog backend.	6. CUSTOMER CONSTRAINTS Limited backend development experience, API configuration issues and database setup complexity.	5. AVAILABLE SOLUTIONS Manual blog management, basic REST APIs, generic CMS platforms and separate AI writing tools.
2. JOBS-TO-BE-DONE / PROBLEMS Create, read, update and delete blog posts through reliable API endpoints.	9. PROBLEM ROOT CAUSE Disconnected tools, complex backend setup, inconsistent validation and difficulty managing data/API operations.	7. BEHAVIOUR Users create and manage blog content, test API endpoints, authenticate users and work with stored data.
3. TRIGGERS Need to create a blog, publish content, update posts, or integrate blog features into an application.	10. YOUR SOLUTION AI BLOGNEST API: a structured Node.js/Express REST API with MongoDB/Mongoose, authentication-related functionality, CRUD operations, validation and AI-assisted blog support.	8. CHANNELS OF BEHAVIOUR ONLINE: REST API, web/application clients, Postman/Thunder Client. OFFLINE: project development, testing and team collaboration.

4. EMOTIONS: BEFORE / AFTER

Before: Users may feel frustrated by complex setup, disconnected tools and difficult API/data management.

After: Users can feel more confident and organized when blog operations are handled through a structured API.
