

Project Design Phase

Proposed Solution Template

Date	22 September 2026
Team ID	SWTID-2026-8694
Project Name	AI BLOGNEST API
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Blog creators and application developers need a simple and reliable backend to create, manage, store and access blog content through structured API operations.
2.	Idea / Solution description	AI BLOGNEST API is a REST API backend using Node.js, Express.js, MongoDB and Mongoose. It provides blog CRUD operations, authentication-related functionality, validation, error handling, API testing support and AI-assisted blog/content functionality.
3.	Novelty / Uniqueness	Combines a structured blog REST API with AI-assisted content support, database integration and clear API-based operations in one backend solution.
4.	Social Impact / Customer Satisfaction	Helps users and developers manage blog content more efficiently, reduces repetitive manual work and provides a simpler way to interact with blog data through APIs.
5.	Business Model (Revenue Model)	The solution can support a freemium model with basic blog/API features and paid plans for advanced AI-assisted content features, higher usage limits or additional services.
6.	Scalability of the Solution	The API-based architecture can be extended with more users, blog features, AI capabilities and database resources. It can be deployed to cloud infrastructure and integrated with web or mobile applications.
